

MSU-CHM Medical Illustration Project Request Form

Thank you for your interest in working with the medical illustration students as part of the MSU-CHM and Kendall College of Art & Design partnership. Please fill out the following form as thoroughly as possible.

Please be aware that the project will be produced as part of a student's education. To this end, we ask that you be prepared to work with the student throughout the process. This includes identifying references that may be useful prior to the start of the project (Ryan Tubbs is willing and able to help identify resources with your input) and modeling professional behavior throughout the process by acting as a "client". Good communication is critical to a successful product and we ask that you do your best to travel to downtown Grand Rapids to meet with the student at the start and at the end of the project. In addition, you will be asked to utilize email for sharing thumbnails and possibly rough drawings of the project at various stages.

Name:

Title:

Department:

Email Address:

Telephone Number:

Description of the illustration(s) or animation(s) desired:

Please indicate the nature of your request:

Please indicate your preference of end product:

Please indicate how the requested artwork will be used:

Are you willing to travel to Grand Rapids to meet with the assigned medical illustration student(s) at the start of the project, dependent on your availability?

Will you be able to dedicate time during the project to review thumbnails and rough drawings?

Submitted projects will be reviewed upon receipt and determined whether appropriate for a student project. If so, you will be expected to provide examples of existing materials or other resources that will be used to communicate your needs and help the artist understand the project. These resources can include illustrations, schematics, tools, articles, animations, photographs, etc. Please feel free to include resources with this form. If upon review your submission is not selected as a student project, you may be referred to a professional medical illustrator. Thank you!

Please refer to <http://www.kcad.edu/programs/undergraduate/medical-illustration/> for examples of projects that have been completed by students in the medical illustration program.
