9:30am – 11:30am

Michigan State University  
Secchia Center, Room 120  
15 Michigan Street NE  
Grand Rapids

## Molly Moravek, MD, MPH

Dr. Molly Moravek is an Assistant Professor in the Department of Obstetrics and Gynecology, Division of Reproductive Endocrinology and Infertility, and the Department of Urology. Dr. Moravek received her bachelor's degree at the University of Michigan, then attended the University of Michigan Medical School, where she received both her medical degree and a master's degree in public health. She completed her residency in Obstetrics and Gynecology at the University of Michigan, and her fellowship in Reproductive Endocrinology and Infertility at Northwestern University, where she also received a master's degree in clinical investigation.

Following fellowship, Dr. Moravek was recruited back to the University of Michigan, where she serves as the director of the Fertility Preservation Program and the IVF Medical Director. Under her leadership, the fertility preservation program has expanded significantly, allowing more patients to receive fertility counseling and preservation services before starting chemotherapy or radiation. Dr. Moravek also follows these patients after treatment, providing fertility services and hormone replacement, if needed. Dr. Moravek also has a clinical interest in transgender care and provides gender-affirming hormone therapy and fertility counseling and treatment for transgender and gender non-conforming patients. She is currently developing a multi-institutional database to track IVF outcomes in transmasculine individuals to identify best practices.
